Segun Ajiboye

Software Engineer

Salt Lake City, Utah, United States

Summary

It has always been my passion to be involved in building something new that could shape the world in a positive direction, this with my passion for IT led me to pursue a career in software engineering.

Experience

Fidelity Investments

Software Engineer (Java, Spring, Typescript, Angular)

November 2023 - Present (1 year 1 month)

Developed and maintained web applications with Angular for the frontend and Java for API, adding new features based on what the business needed and improving the user experience with custom pipes and dependency injection.

Created responsive web pages using HTML and CSS, focusing on a clean and engaging design that meets best practices.

Handled application builds and deployments using Jenkins, ran performance tests with Mox and Rushhour, and tackled critical code issues highlighted by SonarCloud to enhance code quality.

Worked closely with cross-functional teams through ServiceNow and Jira to manage incidents and track stories, while also documenting database queries and setting up environments to streamline processes.

Revature

Software Engineer

May 2023 - October 2023 (6 months)

Core Java · Angular · Jenkins Core · TypeScript · JavaScript · GitHub · Agile
Project Management · Trello · SpringBoot · SpringData · SQL · AWS(RDS S3
EC2 Lambda)

McKesson

IT Tier II Support

August 2022 - August 2023 (1 year 1 month)

Atlanta, Georgia, United States

Functioned as a Field IT Support Engineer, where I managed PC refreshes, deployments, and software installations while handling 5 to 8 IT tickets daily using ServiceNow and Jira.

Troubleshoot hardware and software problems across various platforms, including Microsoft applications, databases, network connectivity, and printer issues.

Provided support for domain accounts, including unlocking accounts, resetting passwords, and assisting with BitLocker recovery through both Active Directory and the Azure portal.

Resolved Oracle and Snowflake ODBC connection issues by installing drivers and setting up the System DSN, and helped manage user access in Active Directory.

Education

Nucamp Coding Bootcamp

Certificate, Software development · (May 2022 - November 2022)

IGlobal University

Master of Science - MS, Information Technology · (2018 - 2019)

University of Ilorin

Bachelor's degree, Economics · (2012 - 2016)
