Professional Summary

Software Engineer with over 2 years of experience in designing, developing, and maintaining scalable web applications. Skilled in Java, Spring Boot, and Angular, with hands-on experience in databases (MySQL, Oracle, AWS DynamoDB), cloud platforms (AWS), and distributed systems. Adept at writing optimized queries, building responsive user interfaces, and collaborating with cross-functional teams. Strong problem-solving skills, and a proven track record of delivering high-quality solutions in fast-paced environments.

Skills

Programming: Java, Python, TypeScript, JavaScript

Frontend: Angular, React, HTML, CSS, Bootstrap

Backend: Spring Boot, Node.js, Express.js

Databases: SQL, MongoDB

Cloud & DevOps: AWS (RDS, S3, EC2, Lambda, SQS, SNS), Jenkins, Docker

Messaging & Distributed Systems: AWS SQS

Version Control & Tools: GitHub, ServiceNow, Jira, Trello

Agile Methodologies: Scrum, Kanban

Soft Skills: Problem Solving, Team Player, Time Management, Self

Motivated, Stakeholder Collaboration, Strong Work Ethic

Work History

Full Stack Software Engineer, 08/2023 to Current

Fidelity Investments – Salt Lake City, UT

- Develop and maintain scalable web applications using Angular for frontend and Java Spring Boot for APIs.
- Write efficient and optimized SQL queries in OracleDB and DB2, reducing query execution time and improving database performance.
- Build and deploy applications using Jenkins, Docker, and AWS cloud services, ensuring high availability and seamless CI/CD integration.
- Optimize application performance and security by identifying and resolving critical issues flagged by SonarCloud, reducing code complexity and improving maintainability.
- Work in a fast-paced Agile environment, collaborating with product owner, designers, and stakeholders to deliver features on time.
- Contributed to the Implementation and monitored a robust pipeline for efficient message processing through batch operations using AWS SQS, Lambda Functions, Splunk and CloudWatch, reducing failures and improving throughput.
- Wrote Python Script to reconcile data differences there by reducing manual efforts.

Associate Software Engineer, 08/2022 to 08/2023

McKesson – Atlanta, GA

- Refactored legacy codebase for improved maintainability, paving the way for easier future updates.
- Conducted thorough code reviews to maintain high standards of code quality and encourage best practices among development team.
- Collaborated with Business units and made UI changes using React Libraries.
- Involved in Database design and Implementation for web Application using Oracle Sql and Snowflake.

IT Field Technician, 02/2018 to 07/2022

IT Concepts and Solutions

- Provided IT support and troubleshooting services for businesses outsourcing technical tasks.
- Performed software installations, system upgrades, and network troubleshooting.
- Diagnosed and resolved hardware and software errors to minimize downtime.
- Conducted PC refresh projects, including data migration, backup and system configuration.
- Ensured timely completion of tasks while maintaining high client satisfaction.

Education

Certificate: Full Stack Engineering With React, 07/2022

Nucamp - Atlanta

Professional Development: Full Stack Engineering with React, React Native, Node.js and MongoDB

Master of Science: Information Technology, 03/2019

Washington University of Science And Technology - Vienna, VA

- 3.93 GPA

Bachelor of Science: Economics, 09/2016

University of Ilorin

Certifications

AWS Certified Cloud Practitioner
